## Personalised lumbar support

**Alivio** features a height adjustable lumbar support which provides an ergonomic solution irrespective of the person's height.

The lumbar support allows for easy adjustment without having to get up or go around to the back of the chair.

## Armrest for optimal elbow support

**Alivio's** high grade PU armrests are sturdy yet soft, providing firm support and comfort at the same time. The armrests are easily adjustable with the simple press of a button.

The retractable armrest slides all the way back allowing the chair to go into the workstation, enabling good elbow support while working.

## Easy to use controls

The **Alivio**'s synchro - 4 mechanism adds a new dimension to the term "ease of use". The synchro - 4 mechanism is easily accessible from the sitting position and the back tension can be adjusted with just a twist of the knob.

The synchro tilt mechanism provides coordinated movement of the seat and back to support change of posture for comfortable working through the day.

## Sculpted headrest

**Alivio**'s optional head rest provides excellent support for the neck and shoulders, keeping the upper spine refreshingly relaxed.
