

levitate™

elevate the working comfort

Designed by Michael Foley

WIPRO FURNITURE

CONNECTING THE DOTS

BRIDGING THE GAP

Inspired by Wipro's philosophy and values,

the idea of

CONNECTING THE DOTS & CONNECTING

INDIVIDUAL ideas,

insights and

innovation.

Wipro Furniture and the renowned designer Michael Foley present Levitate – a range of furniture designed to elevate the working comfort, express culture and foster belonging. Addressing the future agile work environments in India and alternate workspaces - beyond workplaces like an industrial setup or a home; Levitate elements can be arranged in configurations and that can evolve as needs change. Layers of colour & material create visual consistency and enhance the flow of movement from an individual to group activities, and from private to shared spaces. This new furniture range bridges the gap by innovating the way furniture units can come together to create interesting formations triggering maximised collaboration.

as an initiative under the 'Atmanirbhar Bharat Abhiyan' or 'Self-Reliant India Mission', this product is completely designed & manufactured in India

Michael Foley - a Bangalore-based designer and NID alumnus established Foley Designs in 2006, prompted by the universality of design.

Collaborating with Wipro Furniture, Michael glances through a periscope of consumer and market insights, to create viable, design-led solutions.

As we learn to work and adapt in a Covid world, some of the more immediate suggestions include reconfiguring desks to reduce face-to-face orientation. It also suggests using more open spaces for meetings of more than five people as well as leveraging flexible furniture with movable whiteboards and screens to create boundaries.

Levitate - by Michael Foley, evolves into effective and feasible reality that creates meaningful engagement.

“ Our working habits are going through a creative transformation, expanding the way we adapt and interact with spaces. This is a promising perspective change and, hopefully, will transform the way we work in the future. ”

Michael Foley

REDEFINING THE CHANGING WORKSPACE

With the fast-paced change in workstyles and working habits, organisations are progressing towards creating a greater balance between conventional work practices, flexibility and comfort. New collaborative solutions are largely driven by the need for innovation and speed of decision making.

As we work beyond workplaces, collaborative work is more dependent on technology than ever and has changed the way we work. Devices have become indispensable, bringing in connectivity and accessibility anywhere.

While we witness this paradigm shift, there is an evolution away from desks and cubicles to far more agile comfortable environments. The rise of alternate type of workspaces that are more engaging, less regimental and more resimercial, redefines the real need for smart, functional, flexible and collaborative 'interaction furniture', which is the design thinking approach brought to you through **Levitate**.

Levitate increases productivity and proficiency by extending the freedom to work and largely drive the need for innovation and speed of decision making.

A collective of thoughtfully designed furniture that can quickly transform an open office plan into an agile and productive space, creating a comprehensive office environment.

Easily movable furniture elements to create reconfigurable functional spaces that address 5 key workstyles from dedicated work, mentoring / learning, brainstorming, team support to impromptu meetings.

DEDICATED WORK

breaking the archetypal 9 to 5 desk job

the new prerequisite

is **isolation**

is **quietness**

your space

your privacy

your mind is occupied

detach yourself

from the crowd

your focus

your own

personal bubble

in a work environment

wired & connected

in an **easy movable**

reconfigurable array

DEDICATED WORK
